Ekko

Ek app. Poora business connected.

A small-business owner discovers the right bundle, sees one clear price, finishes KYC on the phone and tracks activation — in their own language, in one sitting.

Platform Partner unstop

Only 7 in 100 SMB leads become customers today

smb_leads.csv · 5,000 leads · Apr–Jun 2026 — where the current journey leaks

Funnel — quote acceptance is the steepest drop (44%)

7.4%
lead → activation

17.6 days
lead to activation

₹15,053
cost per activation

3×
status calls / customer

54% bought none of what they asked for
198 of 368 customers — sales pitched targets, not needs

56 bundles broke catalogue rules
incl. 18 activations on a cancelled GSTIN — a compliance leak

~39% of drops are visit & contact logistics
unreachable, no time for a visit, visit never scheduled

Who we serve first — and what we sell them

Segment economics from the leads data decide the rollout; bundles mirror what activated customers bought

Segment	Activation	Median bill	6-mo churn	CAC today	Payback	Ekko plan
Professional offices	11.1%	₹6,575	13.8%	₹10,695	**1.6 mo**	Wave 1 · digital
Micro retail & services	4.1%	₹2,470	22.7%	₹20,007	**8.1 mo**	Wave 1 · digital only
Small multi-site	11.0%	₹28,080	10.8%	₹15,614	**0.6 mo**	Wave 2 · partner-assisted
Small manufacturers	12.8%	₹15,910	8.1%	₹15,324	**1.0 mo**	Wave 2 · partner-assisted

Dukaan Digital
Micro retail

~₹1.6–3k/mo

Fibre 100 or 5G AirFiber · 2 lines · POS & UPI · optional CCTV, Wi-Fi, website

Office Pro
Clinics, CA, coaching

~₹5–8k/mo

Fibre 300/1G · email per user · endpoint security · backup · failover

Chain Connect
3–10 sites

~₹28k/mo

Fibre + failover + POS + CCTV per site · SD-WAN · toll-free · WhatsApp

Factory Line
Manufacturers

~₹16k/mo

Leased line · firewall · machine IoT · static IP · fleet tracking

Our approach: one sitting, one phone, their language

Visit + PDF quote + paper KYC + follow-up calls → ~10 minutes in the owner's language

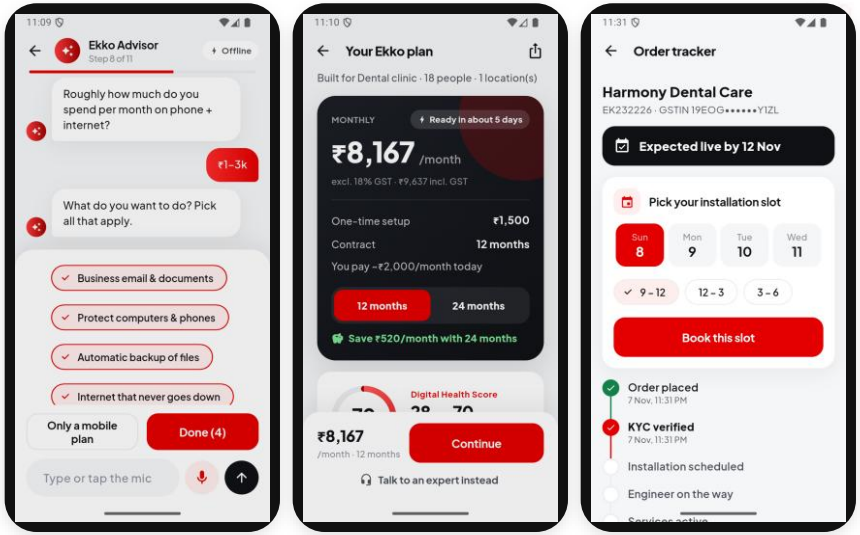

1. Advisor in their language
Chat or voice in Hindi, Tamil, Marathi, English. AI understands; rules decide.

2. One clear monthly price
Toggle add-ons, 12/24-month switch, savings vs today — no product codes.

3. Smart KYC in minutes
GSTIN lookup pre-fills; on-device OCR checks 4 documents; DPDP consent.

4. E-sign & pay
Name e-sign, UPI setup fee, optional partner code.

5. Live tracker
Pick the install slot; WhatsApp/SMS at every step — no need to call.

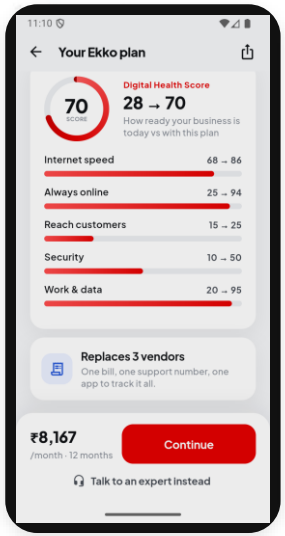

Advisor **Plan & price** **Tracker + slot**

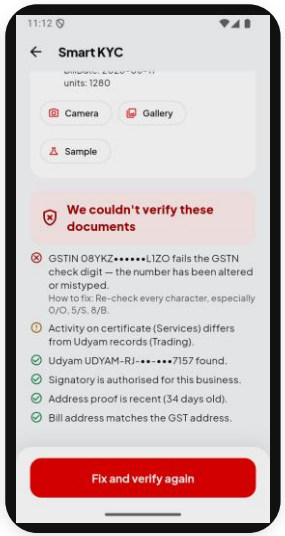

Works offline; when online, our live backend re-checks every order and adds AI understanding.

What makes Ekko different

Built and running: Android app + live backend on Render — not just on slides

Health score

Tampered GSTIN caught

Digital Health Score

Today vs with the plan (e.g. 28 → 70) across internet, uptime, payments, reach, security — sells value, not codes.

Never sells the wrong plan

AI talks, rules decide. Live self-test: 13/13 edge cases, 1,792 profiles, 0 rule violations.

Smart KYC catches fraud

Check digit, GSTN status, name/address match, 90-day bill, signatory role. All 12 specimens judged.

Pick-your-slot install

Owner books the engineer visit — the top reason customers used to call.

Partners earn too

Partner code at checkout + earnings in the partner cockpit; unclosed leads ranked by a propensity model (AUC 0.72).

Privacy by design (DPDP)

Photos read on-device and deleted; SQLCipher; masked IDs; consent log; export & erase.

How it works — AI where it helps, rules where it matters

Offline-first app · deterministic rules engine · AI only for language · privacy by design

DPDP Act 2023 & security

- Itemised notice, separate KYC & marketing consent
- Photos deleted right after OCR
- Masked IDs; phone as salted hash
- No screenshots on KYC; biometric lock
- Export or erase all data
- SQLCipher, HTTPS-only, audit log

Full diagrams + code
github.com/deepakm0003/Ekko

- **LIVE BACKEND, RUNNING NOW:** ekko-api-lgxz.onrender.com/docs (open /ready first; the free tier wakes in ~50 s)

FastAPI + Postgres on Render · 27 endpoints · 55 tests · Groq LLM for language only · the app uses it. Every order is re-checked on the server: wrong bundle → 422, price tampering → 409, partner data → 403 for owners.

Real: rules, pricing, KYC checks, encryption, live backend. Simulated: GSTN/Udyam/DigiLocker (case's mock registries), OTP, UPI.

Platform Partner unstop

Competitive analysis — nobody does it end to end

Everyone sells one product online or needs a visit; the gap is advice + bundle + KYC + activation in one sitting

	Needs-based bundle advice	Own language / voice	Instant KYC on phone	One price & one bill	Live tracking, no calls	Partners included
Airtel Business online (today)	✗	✗	◐	◐	✗	◐
JioBusiness	◐	✗	✗	✓	✗	◐
Tata Tele Business Services	◐	✗	✗	◐	✗	✓
Vodafone V-Hub (UK/EU)	✓	✗	✗	✗	✗	✗
Local reseller / field visit	◐	✓	✗	✗	✗	✓
Ekko	✓	✓	✓	✓	✓	✓

✓ yes ◐ partly ✗ no. Airtel Business online: pick a plan → check feasibility → order (single product). JioBusiness: broadband + cloud bundles from ₹801. TTBS: SMB-focused, demo-led sales.

Target: double activations at under half the cost

Targets we would hold Ekko to, what already works live, and where the field force fits

Metric	Today	Target
Lead → activation	7.4%	**15%**
Days to activate	17.6	**≤ 7 (2 with AirFiber)**
Acquisition cost	₹15,053	**≤ ₹6,000**
Status calls / customer	3.0	**< 0.5**
6-month churn	15.2%	**≤ 10%**

Proven live, not just on paper

● Try it live →

Live backend, tested end to end
OTP login → plan → KYC → order → install slot → partner commission, all on the deployed server with Postgres.

The server can't be fooled
Tampered GSTIN rejected · price edited in the app → 409 · owner opening partner data → 403.

AI that can't go rogue
Groq LLM only reads free text ("around eighteen" → 18); output whitelisted; if AI is down, rules keep working.

+382 customers / quarter
on the same 5,000 leads (368 → 750) ≈ ₹26 lakh of new monthly revenue at the ₹6,900 median bill

Field force & partners stay central
They get the leads Ekko can't close, ranked by score with a suggested bundle, close high-value multi-site deals, and earn on every order they help close via their partner code.
